

Habitat Management (CSP Enhancements)
Colorado Enhancement Activity Job Sheet H-8

January 2005

Name:

Maintain Forbs and/or Shrubby Vegetation Extending from Riparian Habitat

Payment = \$5.00 / Acre / Year for each acre that meets the 25% canopy cover.

This enhancement is intended to increase the acres of riparian and/or adjacent cover for identified wildlife species beyond the minimum criteria set in the conservation practice standard for Riparian Forest Buffer – 391. Proper grazing within these areas is required to manage growth and spread of plants desired for the identified wildlife habitat.

Documentation Required: Use the following table for documentation and attach a plan map showing the location of management units involved in the decision support tool use. An example is provided to assist you.

Management Units	Wildlife Species	Herbaceous Plant(s)	Percent Canopy Cover	Acres
Field 9	Example Bobwhite Quail	Sand sage	34	20

Utilize Decision Support Tools to Aid in Grazing Plan Development Certification

I certify that I have applied the decision support tool described in the narrative for the field(s) listed in the table above.
